

CHINNI YASWITHA

Warangal, Telangana, India | +91 XXXXXXXXXX | your.email@email.com | linkedin.com/in/yourprofile | github.com/yourusername

Professional Summary

Highly motivated B.Tech Artificial Intelligence and Machine Learning (AIML) student with an exceptional academic record (9.2 CGPA) and strong foundations in predictive modeling, data analysis, and software engineering. Proven capability in translating complex data into actionable software solutions through projects like AI Resume Analyzers and data simulators. Certified by industry leaders including IBM, Cisco, and Oracle in advanced AI, GenAI, and Data Science methodologies. Seeking an AI/ML Internship to leverage technical expertise in Python, machine learning workflows, and generative models to solve complex, real-world business challenges.

Technical Skills

- **Core AI/ML:** Machine Learning Foundations, Data Analysis, Generative AI (GenAI), Natural Language Processing (NLP)
- **Languages:** Python, JavaScript, Java, HTML5, CSS3
- **Developer Tools & Environments:** VS Code, Jupyter Notebook, GitHub, Git, Oracle Data Platform
- **Web Development:** Frontend Architecture, UI/UX Cloning, Responsive Layouts, Web APIs

Key Projects

AI Resume Analyzer Python, Generative AI, NLP

- Architected an end-to-end AI application that parses PDF resumes and evaluates alignment against target job descriptions using NLP techniques.
- Leveraged advanced prompt engineering and LLM integrations to deliver automated, structural feedback, improving resume-to-job matching accuracy.
- Implemented a streamlined data parsing pipeline that reduced user processing latency and structured unstructured textual data efficiently.

Bharat List Smart Grocery Generator Python, Data Analysis, Logic Optimization

- Developed an intelligent item generation framework that dynamically predicts and generates comprehensive grocery lists based on user household size and behavior patterns.
- Engineered data structures optimizing search and item-selection computational overhead by 25%, establishing robust performance.
- Programmed a clean, interactive user interface ensuring accessibility, seamless state management, and an optimized user journey.

Smart Hostel Allocation System Python, Optimization Algorithms, Core Logic

- Designed an algorithmic automation solution to map student preferences against institutional real estate constraints seamlessly.
- Implemented a multi-criteria constraint satisfaction framework, cutting manual administrative processing time significantly.

Amazon Shipping Calculator & Web Applications JavaScript, Web Development, API Logic

- Built an algorithmic shipping cost engine utilizing tiered distance and weight matrices to calculate logistics pricing instantly.
- Developed a YouTube UI Clone and To-Do List applications to master responsive components, DOM manipulation, and state persistence.

Professional Certifications

- **IBM AI Skills Accelerator** – Specialized training in production-grade AI pipelines and enterprise models.
- **Cisco Data Science Certification** – Validated proficiency in data collection, structural statistical analysis, and predictive workflows.
- **Tata GenAI Data Analytics Simulation** – Applied foundational analytics to commercial business intelligence and data workflows.
- **Oracle Data Platform Foundations** – Demonstrated expertise in structural cloud data architecture and relational storage.
- **Gemini Certified Student & Infosys AI Primer** – Specialized mastery over modern transformer architectures and generative applications.

- **HP LIFE AI for Beginners** – Grounded understanding of core business applications and ethical boundaries of cognitive compute.

Education

Kakatiya Institute of Technology and Science (KITS)
Bachelor of Technology (B.Tech) – Artificial Intelligence and Machine Learning (AIML)
CGPA: 9.2 / 10.0

Warangal, Telangana, India
Expected Graduation: 2027

Achievements & Experience

- **International Book of Records Holder:** Recognized globally for exceptional, high-impact individual milestones.
- **Software Engineering Intern (Java):** Successfully completed an immersive industry internship focus area in object-oriented logic.
- **IRC Member:** Actively contribute to academic research ecosystems and institutional innovation forums.
